Aspiring data scientist and self-taught Python developer with hands-on experience in real-world simulations.
Completed BCG's GenAI Job Simulation on Forage, building a chatbot that analyzes financial data using Python and pandas. Skilled in turning complex datasets into meaningful insights. Motivated to learn, grow, and create value through data science, automation, and AI. Passionate about building a better future for myself and my family through tech.

🎓 Education

12th Grade Graduate – Science (PCM)

📂 Projects

Financial Trend Analysis, *Analyzed Apple and Samsung's financial data from 2021–2023 using Python and pandas. Calculated year-over-year revenue and net income growth. Presented findings in a clear markdown report using Google Colab.*

Financial Chatbot, *Built a Python-based command-line chatbot that provides financial insights. Used pandas for data querying and applied rule-based logic to simulate AI-style conversations.*

ᕮ Certificates

BCG GenAI Job Simulation – Forage Issued: May 2025 ⧉
Built a chatbot for BCG using Python and pandas.
Analyzed financial documents and developed AI-powered responses to business queries.
